

V1.0

- D1** 1N4001
- R1** 390R
- R2** 4k7 or a value that suits your LED best
- C1** 10uF (10V minimal)
- LED** LED and color of your choice
- VR1** Optional trimpot for LED.
If not used **J1** must be shorted!

If used make sure to first solder **C1** with about 2 mm clearance between the PCB and the bottom of the capacitor and then solder **VR1** to the other side.
